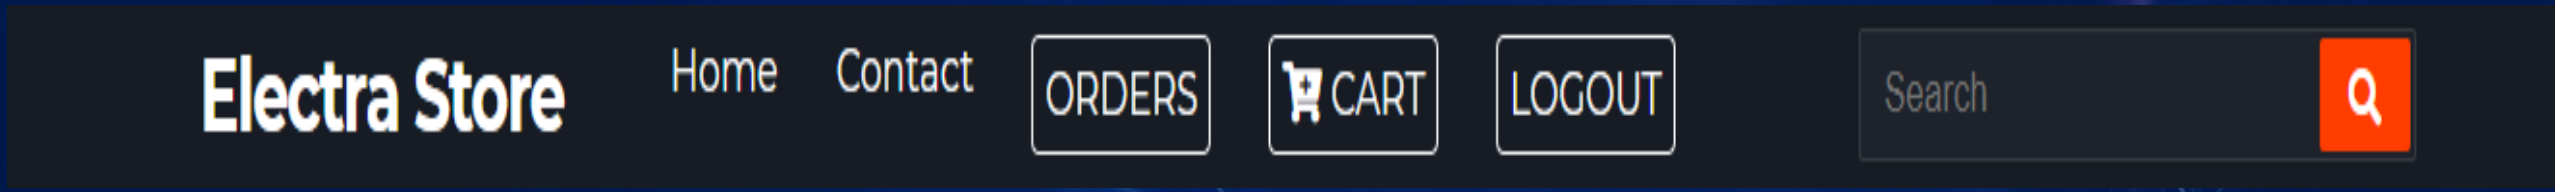
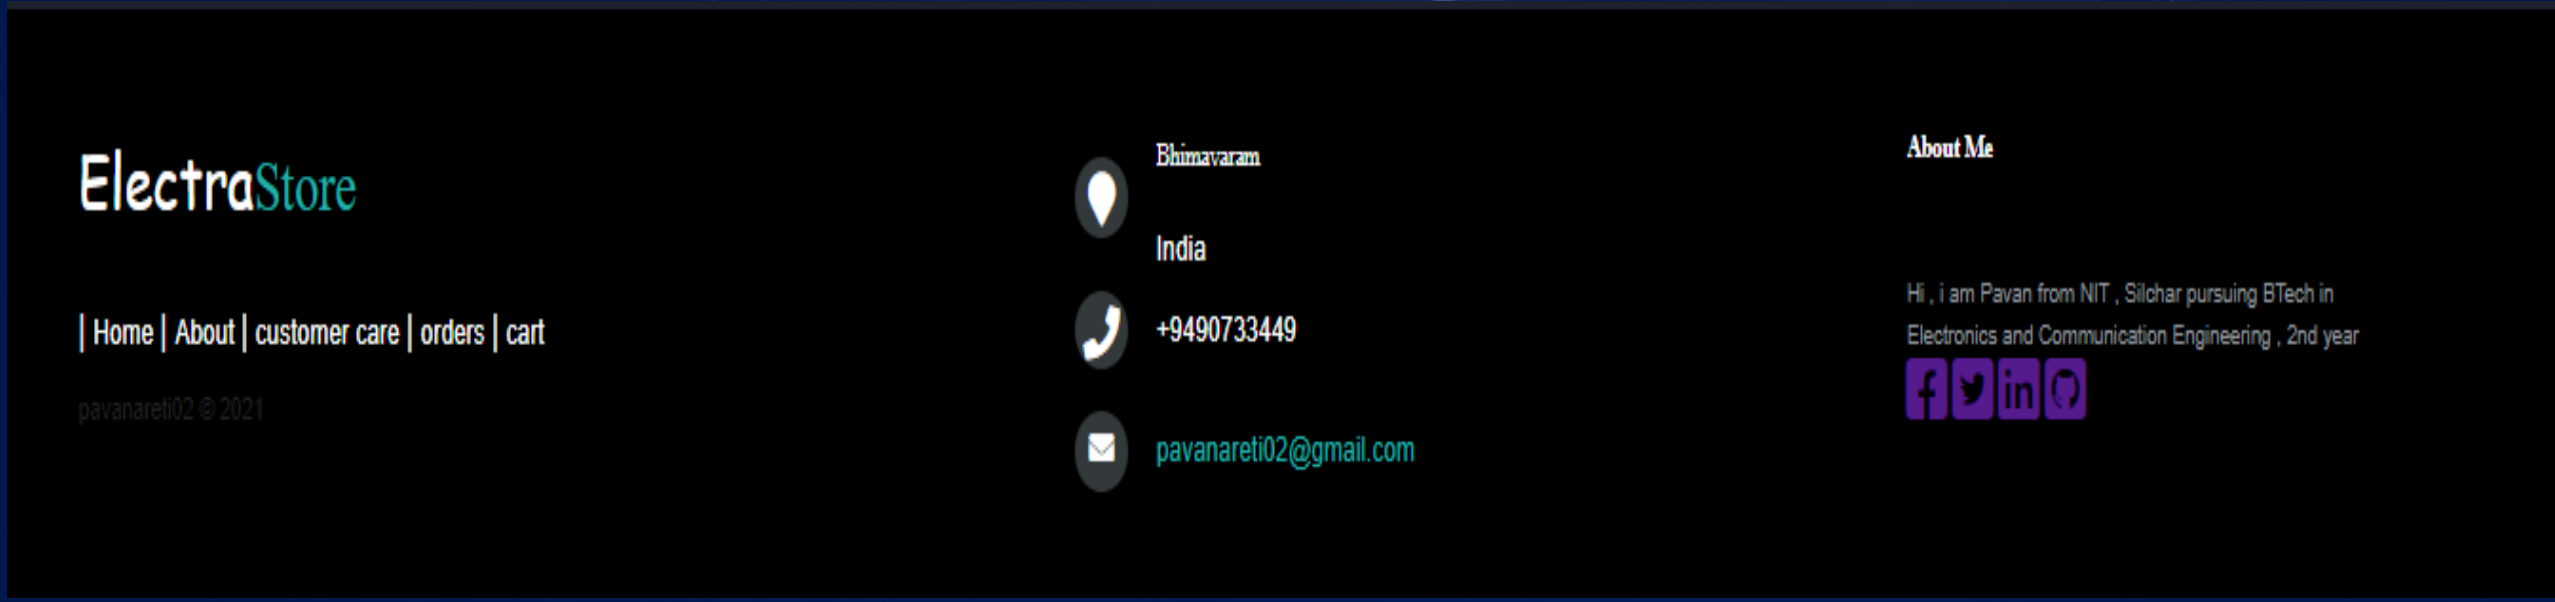
Navbar Section



Footer Section



- I used Html5 , css3 , javascript to complete this project
- Most of the code is written in html5 , css3
- Javascript is used only for search box implementation
- Anykind of Bootstrap is Not used in this Project
- Icons are included from favicon website which provides icons for websites
- All the images are gathered from internet and may also contain copyrighted content
- For each product description is mentioned like where it is manufactured when , material etc; add to button id provided for all items
- Wishlist button is also provided for all the products
- Used css animations and css hover effects to make website beautiful
- Colours In this website are selected from colour palette website name COLORHUNT.com
- Gradients used in cards are selected from GRABIENT website
- Anykind of backend functionality is not included as main aim to show the responsive design skills
- The website is made responsive using css-flexbox and css media queries
